

Concept

PROGRAM 2021

SEPTEMBER 22, 23, 24

Hallucinations across diagnoses

Hallucinations are frequent, common phenomena that are not associated with one specific diagnosis. Previous literature has focused mainly on hallucinations in people with psychotic disorders, like schizophrenia. In the 2021 meeting we aim to highlight phenomenology, mechanisms, imaging, diagnosis and treatment of hallucinations outside the schizophrenia spectrum.

ICHR Conference 2021

SEPTEMBER 22, 23, 24

GRONINGEN, THE NETHERLANDS

HALLUCINATIONS ACROSS DIAGNOSES

ICHR conference 2021

September 22,23,24 • Topic: Hallucinations across diagnoses

Program

The program will be provided both online and live. Depending on the Corona situation, we will allow a minimum of 60 and a maximum of 200 live attendees. The social program also depends on the Corona situation in September 2021. The first day will be coordinated by Marieke Begemann and Ben Alderson-Day and is designated for the Early Career Hallucination Research (ECHR) group, although ICHR members are most welcome too. September 23 will be the core ICHR day, with working groups presenting and key note speakers for hallucination researchers. The evening of September 23 will be open for the general public, including experience experts. September 24 will also be open for other professionals, with key note speakers presenting for a general academic audience.

International Conference on Hallucination Research

Hallucinations across diagnoses
with a focus on hallucinations outside
the schizophrenia spectrum

September 22 • ECHR

Members of the ECHR group and other young researchers will present their research. The ECHR working groups formed in 2020 will provide an update on their work.

Keynote by:

Kenneth Hugdahl:

Lessons from a lifetime of hallucination research

Evening: ECHR-ICHR executive board meeting

✓ Young talent

✓ Working groups

September 23 • ICHR

Keynotes by:

Paul Allen: fMRI-guided neuro feedback

Renaud Jardri: Hallucinations in children

Flavie Waters & Frank Laroï:

Old & New Chair

The ICHR working groups will present an update of their work.

Evening for lay people:

Charles Fernyhough: The inner voice

Rinke van den Brink: Reflecting on my psychosis

✓ New and hot findings

✓ Evening for experience experts

September 24 • General

Keynotes by:

Susan Rossell: Hallucinations in body dysmorphic disorder
